### Visual User Interface Designer

**Category:** Designer

**Type:** Contractor

**Job Summary:** A strong portfolio, available for viewing, showing great sense of design, creativity, and good communication skills is REQUIRED

Come join our client as a Visual/User Interface Designer within the creative services team for the Small Business division. Our mission is to help small businesses succeed. We create marketing and products that are engaging and easy to use so small businesses can start, run, and grow.

As a designer you will be an integral member of a tight-knit team working with marketing, developers, product managers, researchers, writers, and customer facing teams to get a concept right early and iterate toward solutions that get business results. The successful candidate will have superior visual design skills, and possess a keen and quick understanding of business strategy, design patterns and visual trends. You'll be counted on for high-level, out-of-the-box thinking, and for your ability to communicate and influence design solutions that best meet business objectives. Experience defining design direction across a family of products in an end-to-end user experience is a plus.

- Directly responsible for all aspects of design, from delivering concepts and prototypes to UI specifications
- Collaborate with interaction designers to produce appealing, engaging and usable interface design solutions that optimize among customer needs, business constraints, and technological realities
- Approach all projects with a focus on communication hierarchy using layout, color, typography, proportion, iconography, photography, motion / rich media and brand
- Generate multiple concepts that fulfill project requirements, articulate the relative merits of each concept, and make recommendations for which would best meet the project goals

Communicate and escalate opportunities, issues or risks as appropriate

- Foster strong sense of team with fellow designers through solicitation of feedback and constructive contribution to review sessions
- Utilize industry best practices and design standards to define and implement design criteria, guidelines, and specs that effectively communicate to both technical and non-technical audiences
- Use initiative, creativity, collaboration, and innovation to drive more effective design and process ideas to fruition
- Show pride of ownership for a range of project types (from vague to well-defined, or simple to complex)
- Participate in and advance the Intuit Design Community.

- 3-5 years of visual/user interface design experience with Web applications and sites or related degree
- Creative and pragmatic problem solver
- Professional, team player with strong interpersonal skills
- Well-rounded understanding of online usability best practices
- Ability to solicit and incorporate diverse perspectives
- Creativity with an eye towards detail and perfection of visual design
- Ability to switch easily between different projects, and flexibility to handle a rapidly changing environment while delivering high quality results
- Expert level skills in Adobe Creative Suite
- Ability to learn new technology quickly, from core applications being developed to new design tools, new platforms, and new devices

**Location:** Menlo Park, CA
